

Finafex is a state of the art Crypto Asset Exchange that acts as a subsidiary of the Capital Investment Bank (Labuan) Ltd (CIBL), an Investment Bank licensed purview of the Labuan Offshore Financial Services Authority (LOFSA). Finafex crypto exchange will start its operation by allowing crypto trading in the 50 leading cryptocurrencies with the pairs such as Bitcoin, Ethereum, Ripple and other selected cryptos. Finafex also allows trading of selected fiat to crypto transaction pairs. Finafex is a cornerstone of Cryptocurrency and Crypto Asset Industry plans for Offshore Labuan, including a vibrant ICO and followed by Crypto Launchpad platform, Global Remittance and Settlement using Innovative fintech and token for banking ecosystem.

We aim to fully harness the power of cryptocurrency and tokenization offered by innovative blockchain technology and aim to serve as the replacement for the traditional non-transparent Crypto Asset Exchanges with vague business models, uncertain regulatory compliance and lacking in safety and security.

Use Of ICO Proceeds:

Token Allocation:

Our Vision

We envision a fully transparent, regulated crypto trading platform that solves the issues faced by traditional crypto exchanges and in turn enhance the process of crypto adoption by attracting millions of users who previously lacked access to a regulated, secure and fully transparent exchange.

Our Mission

We aim to be the industry leader in facilitating crypto asset trading across the world by serving as the first-ever fully regulated exchange with a bank level security and liquidity, and in doing so resolve the issues faced by crypto traders, while also meeting the needs and demands inherent in the fintech industry.

Standout Features

SCALABILITY

With a throughput of supporting up to one million transactions per second, Finafex has the capacity to support growth of any scale.

TEAM EXPERTISE

Finafex team combines best of both worlds – renowned professionals with years of industry experience and dedicated blockchain evangelists with a track-record of successful projects.

FIAT ENABLED

Finafex offers both crypto to crypto and crypto to fiat trading. Starting from USD, we aim to support all major fiat currencies including Euro, Pound, CHY and JPY.

REGULATORY COMPLIANCE

Finafex business model allows complete transparency and regulatory compliance.

ROBUST FEATURES

Additional services for crypto trading e.g. Trading Limit, Market, Stop/Stop-Limit and Trailing stop-loss. Hedging services against securities, bonds and future market.

A PLATFORM WITH REAL LIFE UTILITY

Unlike traditional cryptocurrencies, Fnx token would have direct utility within the Finafex Exchange, giving it a real life value and potential backing.

PROJECT WITH HUGE POTENTIAL

With a market valuation of USD 210 Billion USD that is expected to significantly grow upto multi-trillion dollars after the addition of security tokens, the market sector offers a great opportunity, and Finafex will be the trail blazer.

PROMISING ROADMAP

Future Plan includes a dedicated FinafexFund, provision of Brokerage Services, and Crypto Asset Custodial Services and Security Token Trading Support.
